

CARNIVAL

The carnival was founded in ancient times by the will of the people that feel the need to break the mold of everyday life, that oppresses the individual existence, and as a desire for the discovery of one's inner well-being resulting from the liberation and the practice of "good madness." Every Carnival you live together with the reality and history of a community is born and develops in a specific historical period, staging

performances with meanings and nuances that reflect the values of the characters that characterize a given time.

The tradition of the Carnival in Termini Imerese has never forgotten its glorious and legendary past, but in recent years a more alive, pungent and current satire made its way. Alongside the real characters in mask, which had animated the Carnival of the past, there are also spectacular and imposing papier-mâché puppets.
